PROFILE

Very strong interest in both Business and Computing. Constantly eager to learn new things and with technology changing all the time, I have found I am able to within this area. A very focused and dedicated individual, always wanting to better and challenge myself. My BSc Business Computing degree has allowed me to study multiple different aspects of both areas and I am now seeking to gain further experience.

PROJECTS

Front-End Developer

Home Start Northampton | Jan 2017 – Feb 2018

The development of a website for a charity to help them promote their work with families. A WordPress CMS is used to create the site which was then passed on to the clients to continue with future maintenance.

Business Intelligence

Analytical Report – Elon Musk, Tesla | Oct 2017 – Jan 2018

An analytical report written on Elon Musk's business, Tesla. An analysis was carried out on Tesla and the findings were aided by graphs and diagrams. The business report later shows data being inputted into the business intelligence tool, Tableau, to show a more visual insight.

Dissertation

Safety Systems in Autonomous Vehicles | Oct 2017 – April 2018

A research project on the safety systems used in autonomous vehicles. An in-depth analysis used to show what the systems features are and how by using them, could possibly bring down the number of road deaths. The future of autonomous cars as a whole is being analysed within this report.

EDUCATION

BSc Business Computing (Web Design) 2015 – 2018

University of Northampton

Website Management, Web Development, Website Design, Databases, Quality and User-Centred Systems, I.T Project Management, Media Technology, Cybersecurity and Cryptography and Business Intelligence.

EMPLOYMENT

Tk Maxx Milton Keynes – Sep 2012, ongoing.

Sales Associate.
